

Module: **Visual Conditions and Functional Vision:
Early Intervention Issues**

Session 1: Working With Families and Eye Care Professionals

Activity A: Video Observation and Related Questions

Instructor Guidelines

The purpose of this activity is to allow participants to become acquainted with clinical procedures used to diagnose visual conditions in infants and toddlers.

Time needed. 60 minutes

Materials. Chen, D., & Orel-Bixler, D. (Writers/ Producers). (1997). *Vision tests for infants* [Video]. (Available from AFB Press, 11 Penn Plaza, Suite 300, New York, NY 10001)

Directions

Participants should view the video *Vision Tests for Infants* and discuss the following questions as a group.

1. Identify assessments or procedures demonstrated in the video.
2. For participants with field experience, which of the individual assessments demonstrated in the video have you seen in a child's eye report?
3. What questions or concerns do you have about any of the individual assessments?
4. How can an early interventionist/TVI prepare families for clinical vision exams?
